

We calculate your heating requirements: That's part of our service!

1. Sender

Customer code: Date:
Company:
Name:
Street:
State: Postcode: Town:
Telephone: Fax:
eMail:

2. Treatment

Process liquid:
Chemical composition:
pH value:
Chemical entrainment: yes, Type: no

3. Tank

Material:
Insulation: yes no
Insulation material:
Place of installation: indoors outside
Fume extraction (m/s): yes: no
Lid (%): yes: no
Tank dimensions in mm (clear values):
Lenght: Width: Height:
Diameter: Height:
Storage Tank: yes: horizontal vertical no
Liquid level (mm): min.: max.:
Side thickness (mm):
Insulation thickness (mm):

We offer you our computer-aided calculation for effective and efficient planning for heating your container or treatment equipment. The result enables you to choose the optimum heating solution for your needs and will help you to plan cost-effectively.

4. Temperature

Ambient temperature (°C):
Working temperature (°C):
Required heating up time (h):

5. Process

Material to be treated:
Weight per hour (kg/h):

6. Electrical Data

Supply voltage (V): at (Hz):
1-Phase-AC 3-Phase-AC

7. Position in Tank

Arrangement in Tank: vertical horizontal
Fixing: flanged screwed welded
for L-type heater mounting lenght in mm (top edge - bottom):

8. Control equipment

Temperature controller No. of set points: 1 2
Level controller No. of switching points: 1 2 3 4

9. Monitoring equipment

Temperature limiter
Level control (Dry-running protection)
